

about me

Major: Software Engineering
Minor: Bioinformaics

Hometown: Cleveland, OH

I am a student at Miami University pursuing a Bachelors of Science in Software Engineering and a minor in Bioinformatics. I am finishing my third year at Miami University, and I will be graduating in May of 2018. My main interest is programming. However, studying Tropical Marine Ecology in the Bahamas last summer led me to my minor in Bioinformatics. Outside of classes I spend most of my time in different engineering and computing organizations at Miami University. I am a founding member and secretary of the Association for Computing Machinery - Women (ACM-W) on campus.

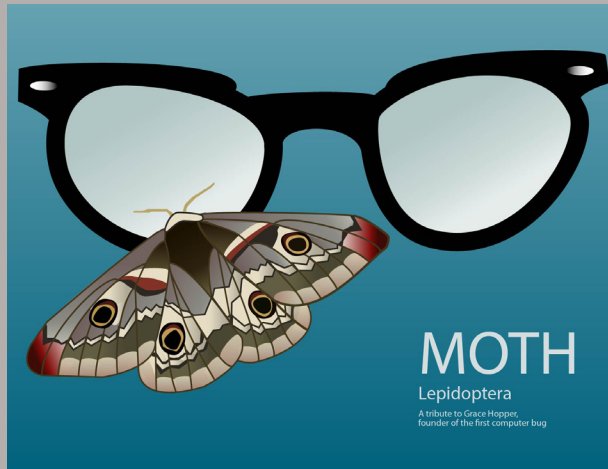

Emily Richmond

Software Engineer

illustrator

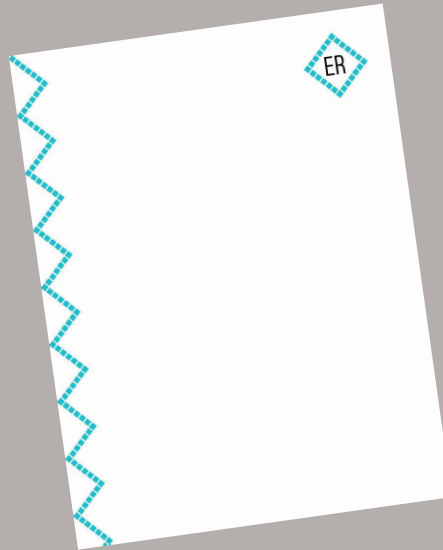

This is a portrait of Princess Leia. I used words from different Star Wars movies to fill in her face using illustrator.

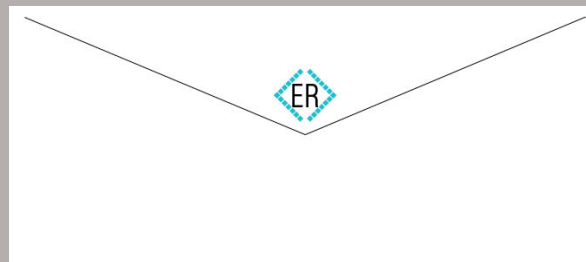

This moth was created in illustrator using shapes and lines. The glasses represent Grace Hopper's glasses, as she found the first computer bug, a moth.

inDesign

This is stationary and business cards that were made using the logo from illustrator and inDesign.

Below is an envelope using the logo from illustrator and it was created in inDesign.

photoshop

This is a self portrait that I made in photoshop. I used the Andy Warhol method to design the portrait.

This is an old image I found on the internet. I inserted myself into the image as the one driving the sleigh.
